Inspection Memo  
to Coal File:

RE: Beaver Creek Coal Company  
Wild Horse Ridge Exploration  
CEP/015/007  
Emery County, Utah

An inspection of the exploration sites at the top of Wild Horse Ridge was conducted on August 5, 1983, by Barton Kale of the Division.

The access road indicated on the map submitted by Beaver Creek Coal Company has not been built at this time, so it could not be determined how many drill sites had been disturbed by helicopter access.

The Forest Service road continues past the proposed drill site access road to a point out on the ridge. At its furthest point there are 5 barrels, 3 of which are filled with petroleum products and 2 are empty. Unless otherwise determined it is assumed these items are the responsibility of the Beaver Creek Coal exploration program.
